1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to show a process for determining the resistivity of the formation wherein a current is injected into the casing to cause a current leakage in the cement of an overlapping part, the leakage current in the cement in the overlapping part is determined, and is used to deduce the measured resistivity of the cement, and the measured resistivity of the formation is corrected using a factor to take account of the measured resistivity of the cement to obtain the resistivity of the formation. Because none of the prior art teaches or suggests this element, this feature, taken together with the other limitations of the claims renders the claims allowable over the prior art.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
